

Exploratory analyses Lathyrus

Distribution of missing data

Outliers

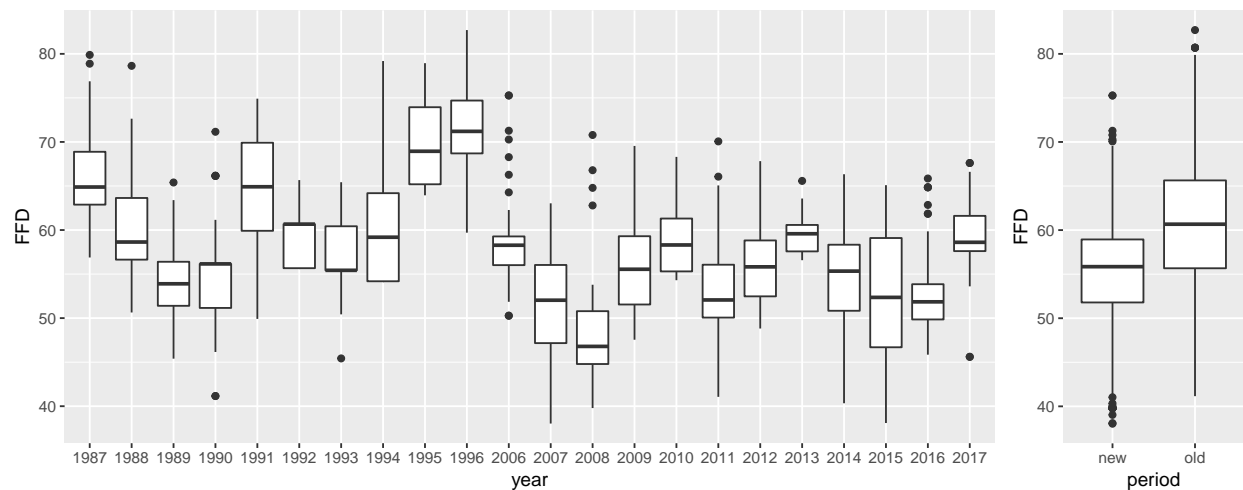

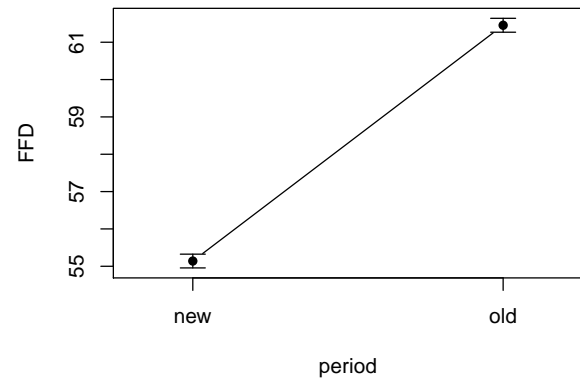

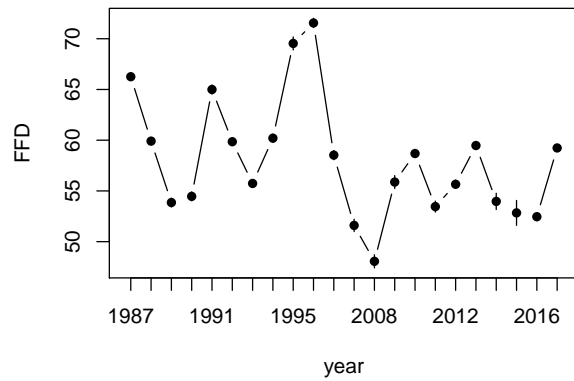

Homogeneity of variance

```
## Warning: Removed 10580 rows containing non-finite values (stat_boxplot).
```

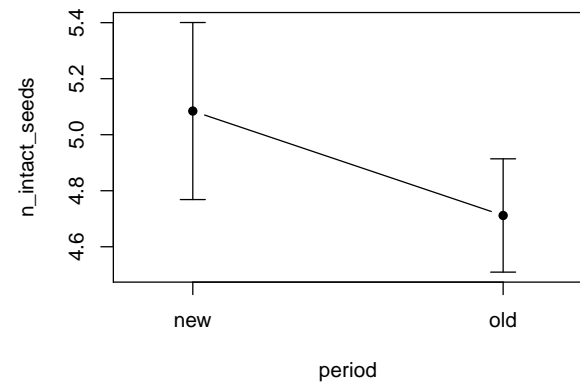

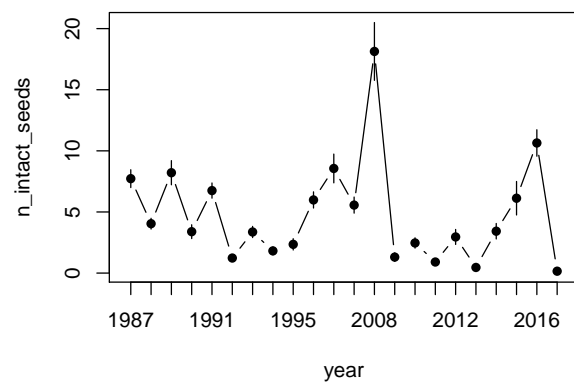

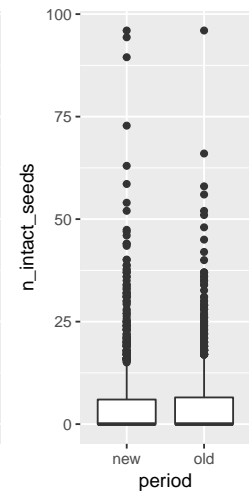

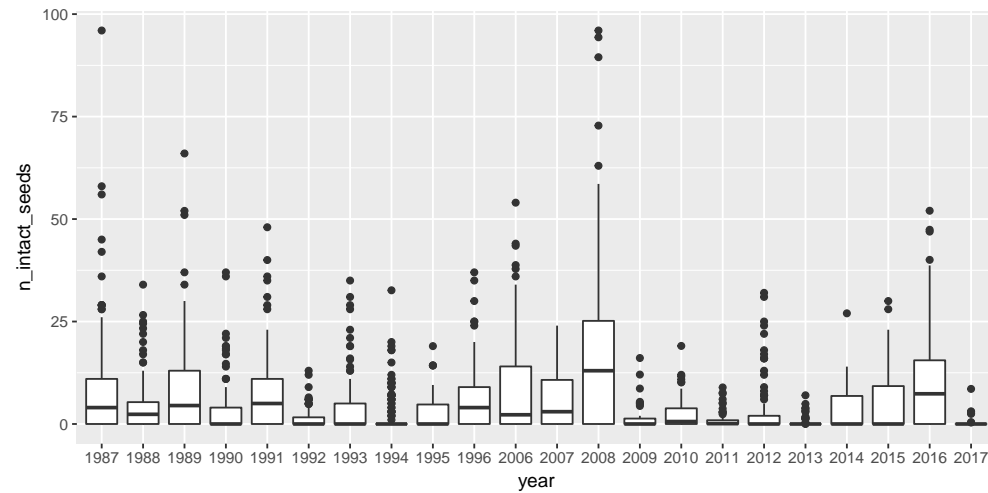

```
## Warning: Removed 10580 rows containing non-finite values (stat_boxplot).
```

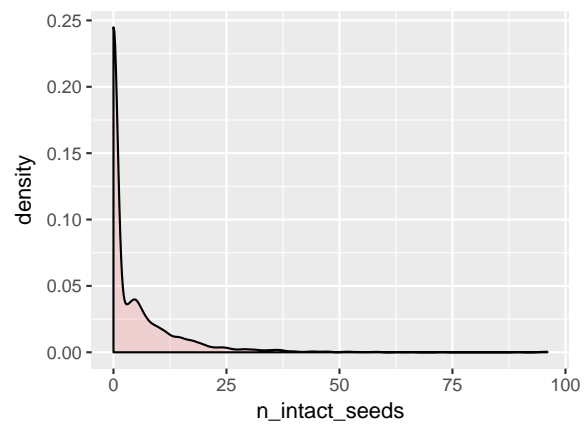

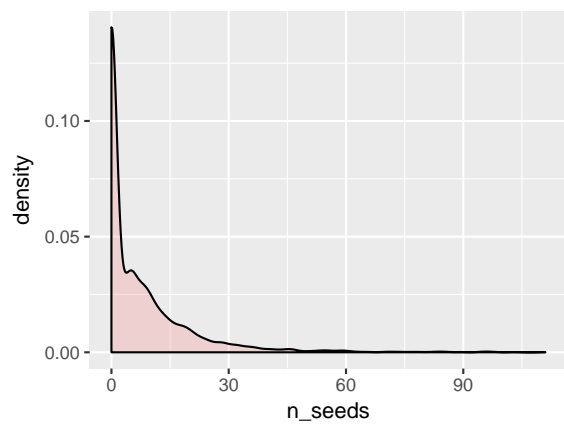

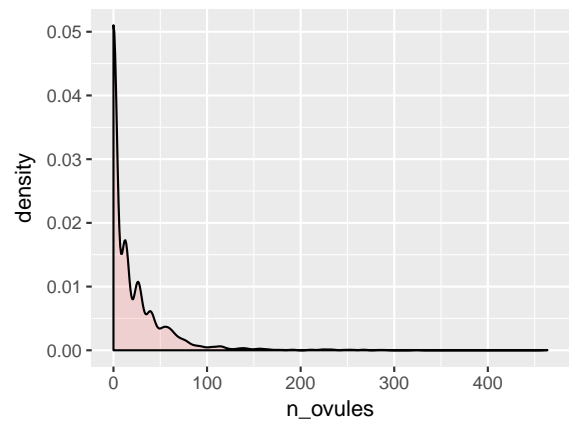

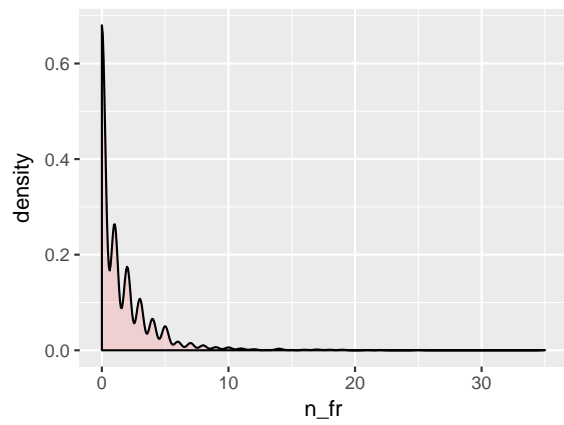

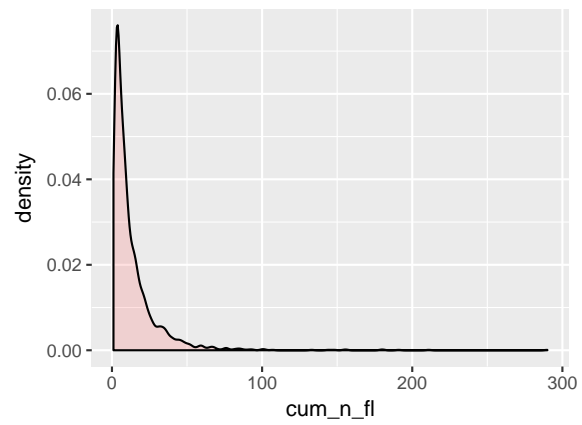

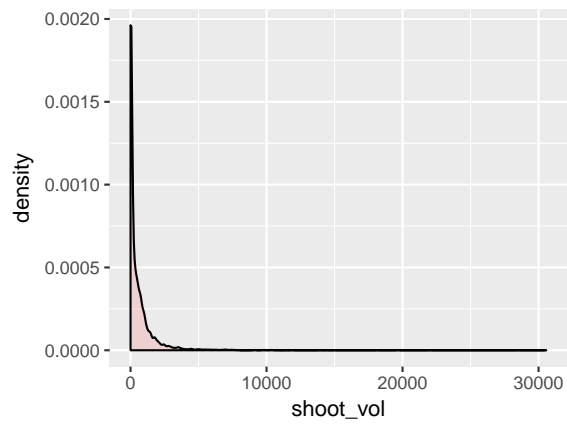

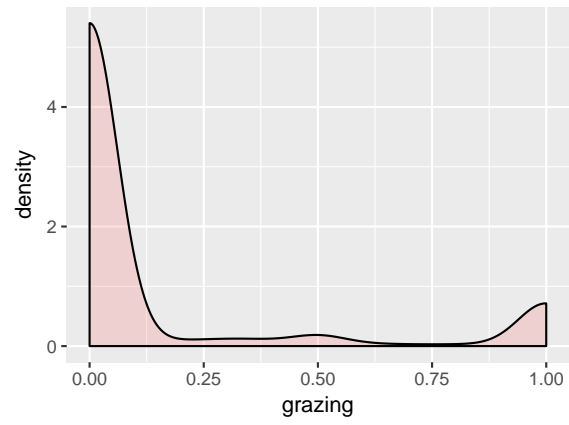

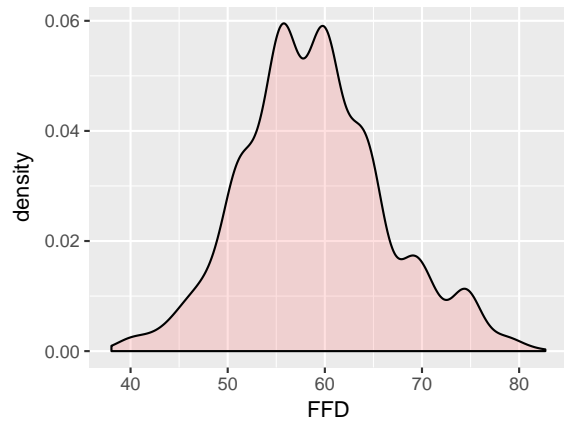

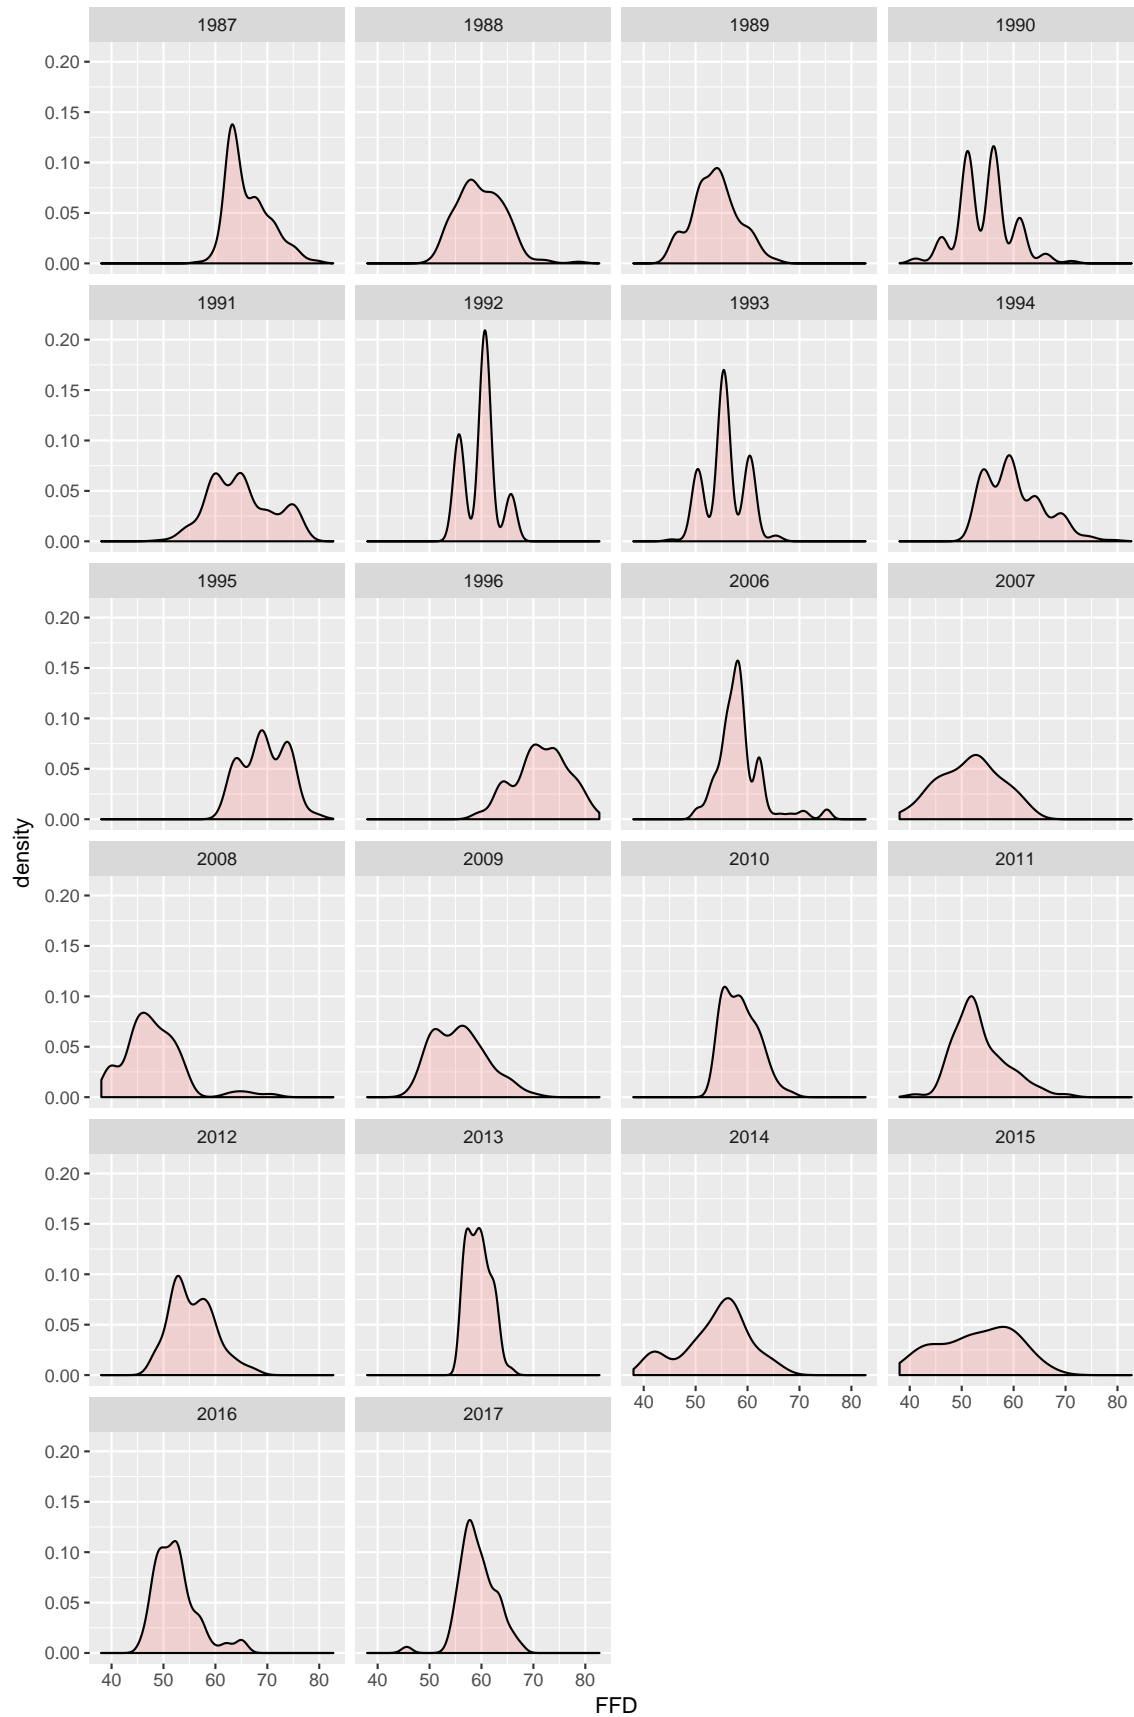

Warning: Removed 10449 rows containing non-finite values (stat_boxplot).

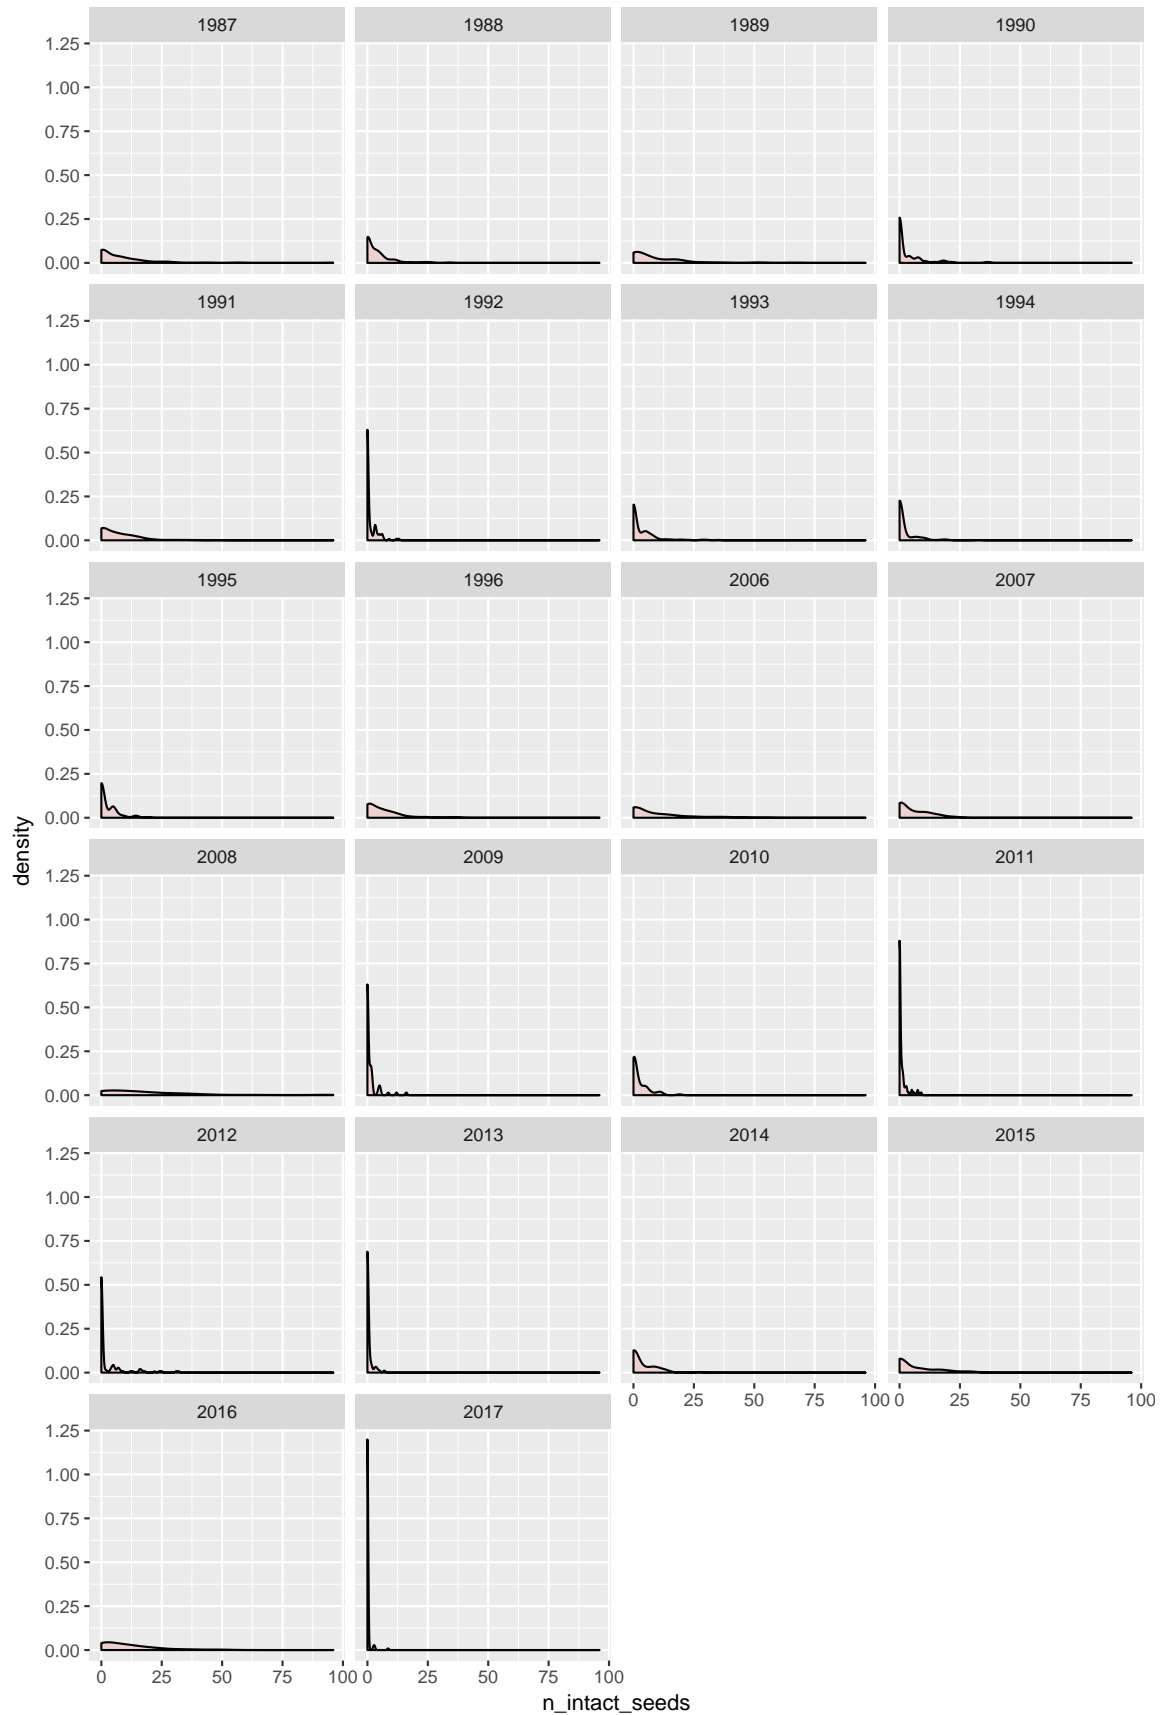

Warning: Removed 10449 rows containing non-finite values (stat_boxplot).

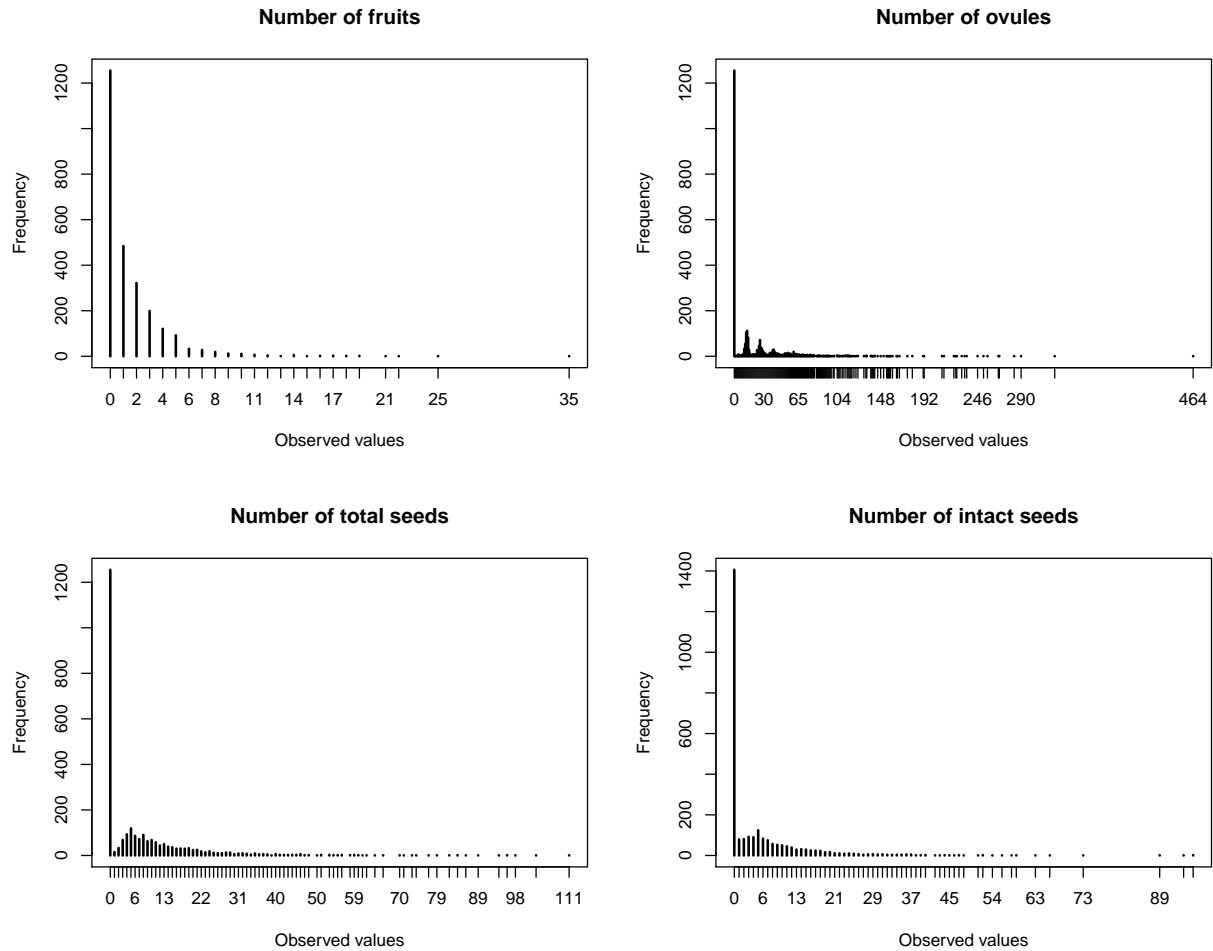

Distributions

Zero values

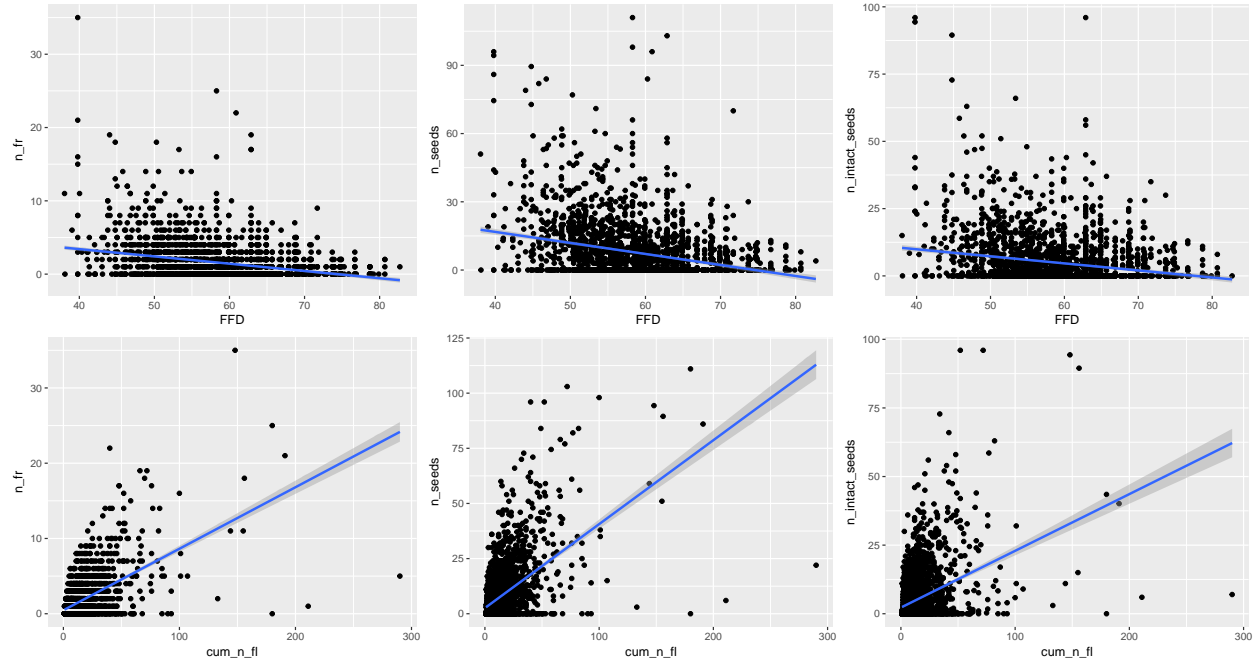

Collinearity

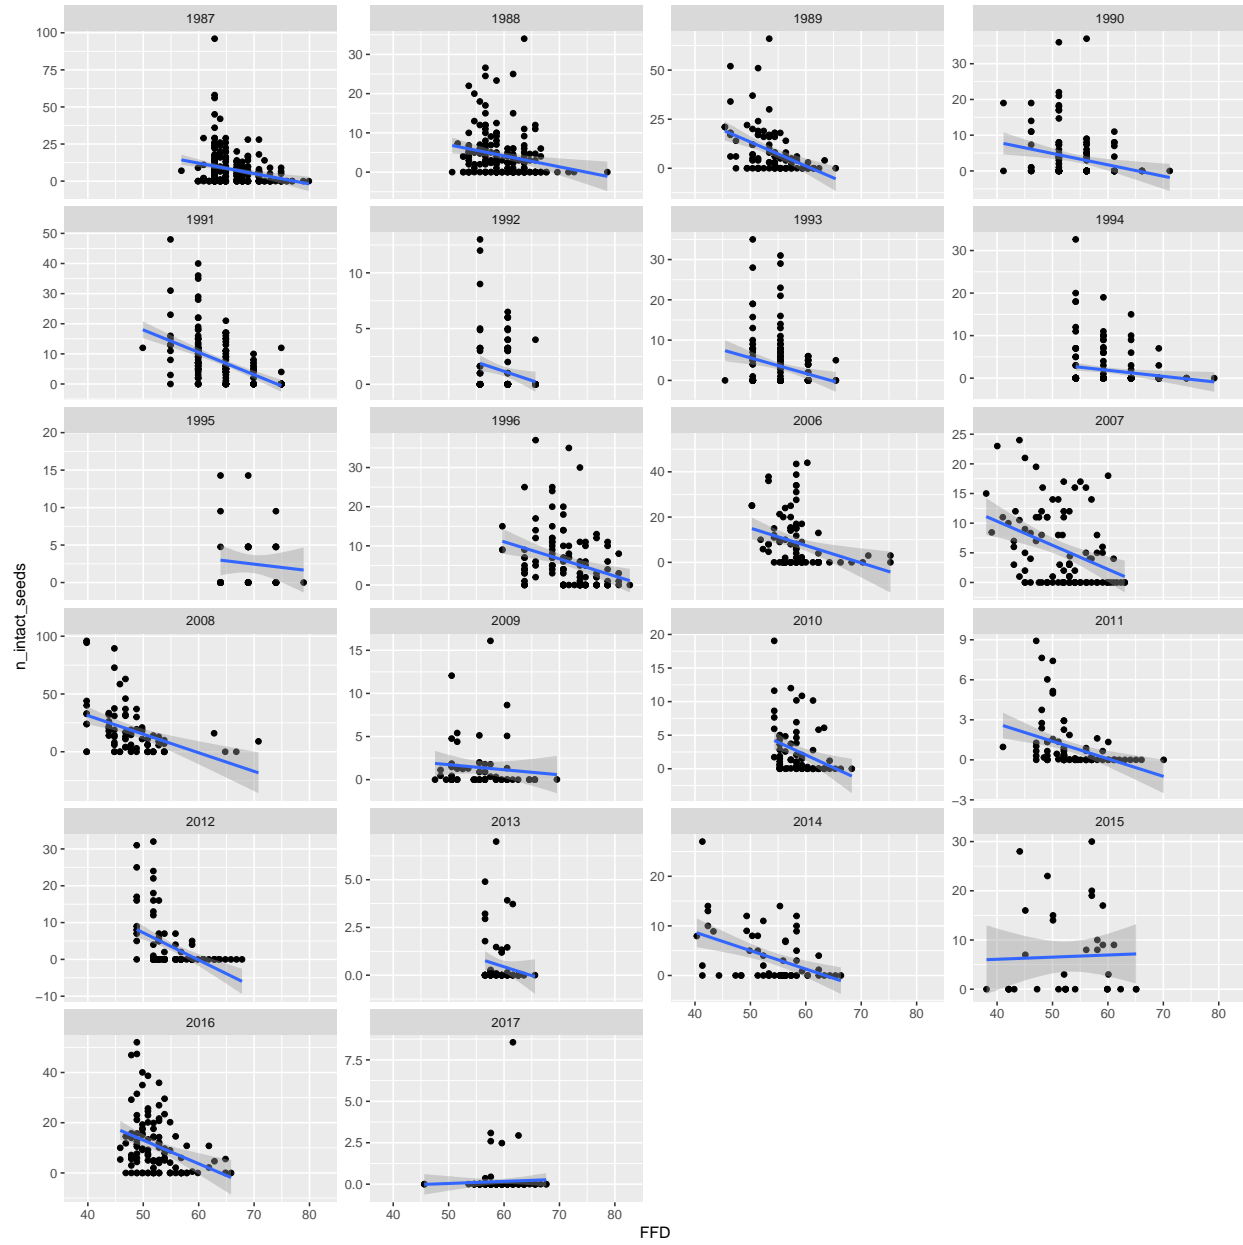

Correlation among FFD and number of flowers is not so important

```
## [1] -0.3723126
```

Relationships between variables

N intact seeds and FFD for all years

Grazing and FFD
